KHARKOV AIRFRAME PLANT NO 135

KHARKOV, USSR

Kharkov Airframe Plant No 135 is located at 50-01-16N 36-15-38E in the northeastern outskirts of Kharkov, USSR, approximately 2.5 nautical miles from the center of the city (Figure 1). The plant adjoins Kharkov Airfield North and is served by major roads. The nearest rail facilities are located within the city of Kharkov.

Kharkov Airframe Plant No 135 was observed on photography from (Figure 2). At that time the plant contained approximately 1,393,855 square feet of floorspace. A comparison of this earlier photography with that from reveals

additions totaling approximately 136,315 square feet of floorspace (Figure 3). These changes include a major addition to the machine shops (item 5). Several small buildings which were located at the site of this addition were removed; the floorspace of the removed buildings totaled approximately 18,000 square feet. A small addition to the subassembly section (item 2), an addition to a probable shop (item 9), and four small workshop and storage buildings are also new since The machine shops were enlarged and the addition to the subassembly section was constructed between and The addition to the probable shop was under way in and was completed by

Kharkov Airfield North serves as a flyaway field for the plant. The airfield has a serviceable northeast/southwest concrete runway which measures approximately 5,900 by 190 feet. The runway was being surfaced in [redacted] and surfacing appeared completed by [redacted]. The runway is connected by taxiways to the final assembly hall (item 1), aircraft

parking areas, and a repair hangar. Further extension of taxiways to parking areas is indicated. Three COOKPOT and one CAB were observed at the airfield in [redacted]. Considerable unidentified construction activity is taking place at a site (item 16) in the northeast corner of the airfield. A taxiway connects the site to the airfield's runway.
